

I oppose strongly to Hollywood's efforts to make all of their content fee-based per-viewing. This is simply the first step on their agenda to do so.

I have seen the disturbing trend of DVDs containing product placements and many commercials before the main feature. They are now dictating that these cannot be fast-forwarded through due to software limitations on the DVD media. They are now attempting to ram the same type of items down the taxpayers and consumers throats.

Please reject this proposal because in the end will not only harm the average taxpayer and consumer!
